April 25, 2017 – For Immediate Release:

Scarsdale Medical Group Offers In-Office ENDOSEE Hysteroscopy

Harrison, NY – Scarsdale Medical Group (SMG), a multi-specialty practice serving Westchester and Fairfield Counties and the surrounding Hudson Valley area, now offers in-office ENDOSEE diagnostic hysteroscopy.

The hand-held equipment consists of a thin tube equipped with a tiny camera that views the interior of the uterus. Its advanced optics allow it to record a full color image that detects abnormalities responsible for abnormal vaginal bleeding, such as benign polyps, cancer, fibroids and scarring. The procedure is minimally invasive; it is done without making incisions, avoids the use of general anesthesia, and causes little discomfort. It can be combined with an endometrial sampling, also done with little discomfort.

“We are excited to offer this to our patients,” says SMG obstetrician and gynecologist Dr. Ronald Reiss. “Since the procedure is done right in the office with no sedation, it reduces the recovery time for our patients. Afterwards, patients will not require the same level of pain medication that would have been needed otherwise.”

For more information, or to make an appointment, call (914) 723-8100 or visit www.scarsdalemedical.com.
